Personnel Badge Lite

What does it do?

This wearable badge combines three functions into a single device:

- **Location Tracking** – The badge reports its location up to four times per second, allowing you to track users in real-time with high accuracy.
- **Communication** – The call button let the user receive and acknowledge warning.
- **PWS Support** – No network infrastructure needed. Visual, audio and haptic alarm between vehicles and vehicles, vehicles and people, vehicles and infrastructure.

How can you use it?

Location Tracking

- You can quickly ensure users are in their designated areas or monitor users who may be in hazardous areas.
- You can capture historical location data for all users to provide precise time and location accountability.

Safety

- Badge sends alarms with flashing LED lights, audible notifications and haptic feedback to alert users when they are entering a dangerous area or being approached by a fast-moving vehicle.

Communication

- Users can press the emergency call button for help.

Key Features

Accurate

Accurate up to 10 cm.

Responsive

200ms latency is essential for safety applications where a fraction of a second makes a difference.

Informative

A flashing LED, audible beep and haptic feedback notify the wearer of safety alerts.

Interactive

A call button lets the user acknowledge alarms and alerts or call for help.
